MOODY'S
INVESTORS SERVICE

A3 / negative
11 June 2020

- › Leadership position as vertically integrated utility within Baden-Württemberg
- › Significant proportion of EBITDA, around 50%, from low-risk regulated distribution and transmission activities and growing share of renewables under contracts
- › Historically balanced financial policy and demonstrated commitment to robust credit quality
- › Difficult operating environment in Germany for conventional generation and challenging retail markets
- › Execution risks relating to a large investment programme, including offshore wind development
- › Somewhat weak credit metrics following VALECO and Plusnet acquisitions, increasing pension and nuclear liabilities because of lower discount rates
- › Strong shareholder support

STANDARD & POOR'S
RATINGS SERVICES
McGRAW HILL FINANCIAL

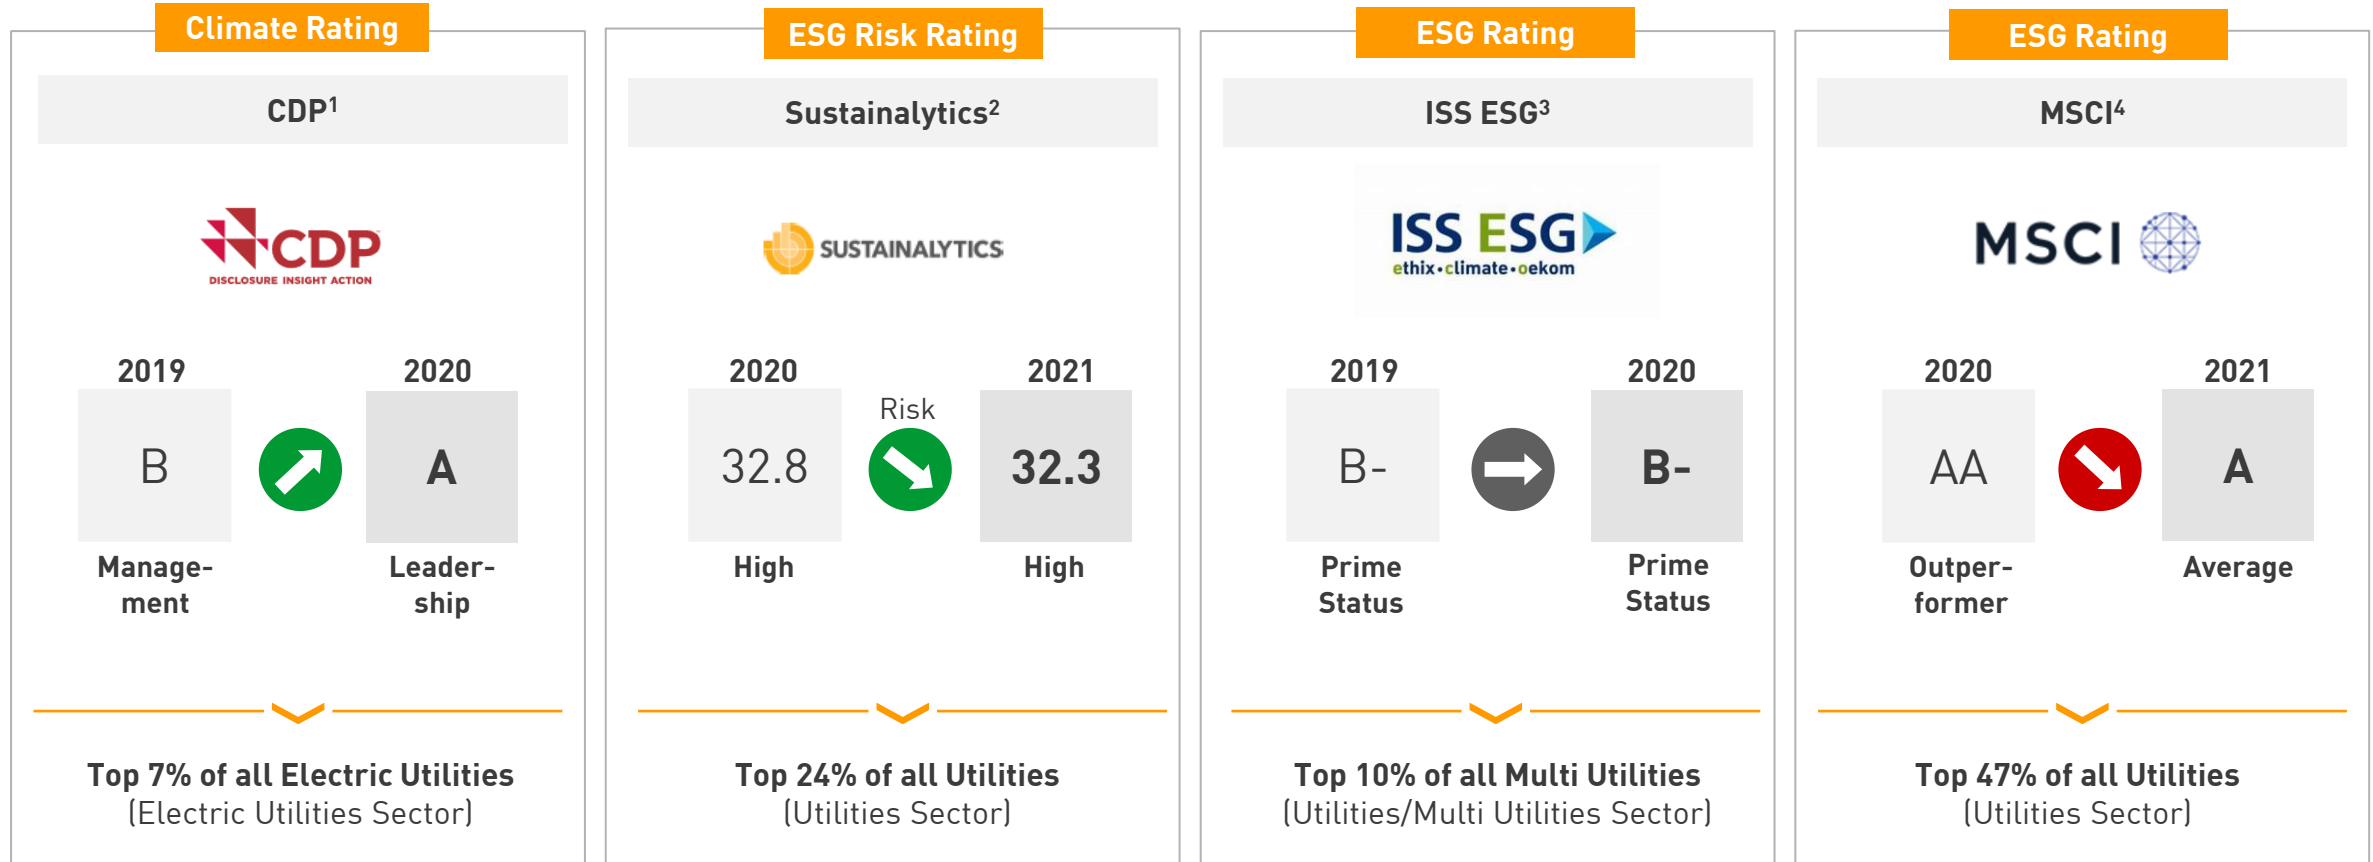

A- / stable
21 May 2020

- › EnBW is strategically lowering its earnings portfolio risk, with improved cash flow visibility
- › Limited exposure to COVID-19 effects
- › Headroom reduced significantly due to an increase in nuclear and pension provisions and the acquisitions of VALECO and Plusnet
- › New sources of EBITDA (contracted renewables and regulated network business) will compensate for higher financial leverage caused by acquisitions in 2019
- › Increased visibility in credit metrics, strengthened by increasing share of sustainable power infrastructure and resilient grid business
- › Moderate likelihood of government support
