1 The figures for the previous year have been restated.
2 In relation to the profit/loss attributable to the shareholders of EnBW AG.

EnBW continued its successful performance with an operating result (adjusted EBITDA) of €1.69 billion in the first nine months of 2019. Adjusted EBITDA was thus 7.4% up on the previous year (€1.57 billion). Revenue came to €14.37 billion (down 3.2%). The number of employees rose to 22,934, an increase of 6.7 percent on the previous year.

This mainly relates to the acquisition of Valeco (KKP2) nuclear power stations. Valeco has contributed to earnings from the beginning of the third quarter. The Hohe See and Albatros offshore wind farms will contribute to earnings from the fourth quarter of 2019.

Capital expenditure in the EnBW Group doubled relative to the previous year. This mainly relates to the acquisition of Valeco and Plusnet. Further investment went into Hohe See and Albatros.

Outlook 2019 (in € million)

- Sales: The main reason for the lower earnings consisted of higher procurement costs for electricity and gas. Plusnet, has contributed to earnings from the beginning of the third quarter.
- Grids: A major factor in the positive earnings performance comprised higher grid revenue.
- Renewables: The improvement is due to earnings contributions from the onshore wind farms acquired in Sweden at the end of 2018 and to the overall improvement in wind conditions at wind farms in Germany. Valeco has contributed to earnings from the beginning of the third quarter. The Hohe See and Albatros offshore wind farms will contribute to earnings from the fourth quarter of 2019.
- Generation & Trading: Earnings on a similar level to the previous year. Forward prices for electricity on the wholesale markets are higher than a year ago. This has been offset by the absence of the previous year’s positive one-off effects on earnings and the unscheduled prolongation of the inspections at the Neckarwestheim (GKN2) and Philippsburg (KKP2) nuclear power stations.

Adjusted net profit attributable to the shareholders of EnBW AG went up from €397 million in the same period of the previous year to some €507 million in the first nine months of 2019.

Adj. EBITDA by segment (€m) & share of total (%)

- Sales: 187,11%
- Grids: 61,299
- Renewables: 18,193
- G&T: 11

Strong Investment Case EnBW
- Access to capital markets
- Solid investment grade ratings
- Sustainable dividend level

Financial Calendar

- 12 May 2020: Annual General Meeting 2020
