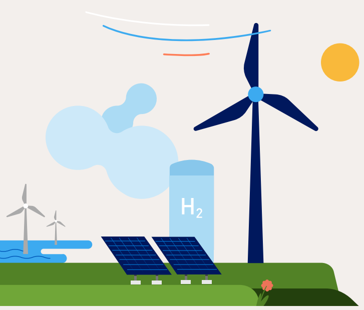
We turn energy into action



at least €40 billion

gross investment by 2030, of which
60 % in the grids,
30 % in generation,
10 % in customer solutions

75% to 80%

The share of the generation capacity accounted for by renewable energies (RE) by 2030
Installed output of RE by 2030:
10 GW to 11.5 GW

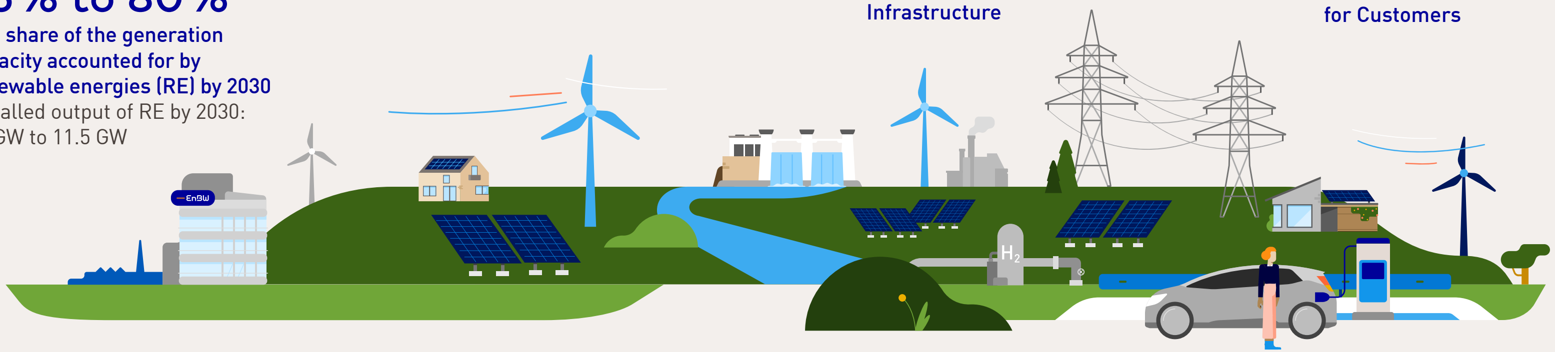
Three segments along the value chain for the energy industry

We are one of the largest integrated energy companies in Germany and Europe. We supply our customers with electricity, gas, water and heating together with products and services related to energy and infrastructure.

System Critical Infrastructure

Sustainable Generation Infrastructure

Smart Infrastructure for Customers



To successfully restructure the energy system, we will need to **balance** the issues of **climate protection, affordability** and **security of supply.**

€4.9 billion

adjusted EBITDA

960 MW

EnBW He Dreiht
offshore wind farm

By 2035

we aim to be **climate-neutral** with respect to our own emissions

59%

The share of the generation capacity accounted for by renewable energies (RE)
Installed output of RE: 6.6 GW
Output of fuel switch projects under construction: 1.5 GW
Output of RE under construction: 1.6 GW

€6.2 billion

gross investment, of which
84.9 % in growth projects

-15%

reduction in CO_2 intensity in own electricity generation compared to the previous year

€3.3 billion

in **green bonds**
issued in 2024

149,000 km

electricity transmission and distribution grid

31,000 km

gas transmission and distribution grid

5.5 million

B2C and B2B **customers**

30,391

employees and 1,269 trainees and students

> 800,000

charging points in the EnBW HyperNetwork
(As of: End of March 2025)

> 6,000

fast-charging points
